

## Dear Colleagues:

- supercomputers developers, system and applied software engineers,
- grid and cloud technology and service developers
- postgraduate students and young scientists
- representatives from supercomputing centers
- HPC users

## Forum has been supported by:

The forum is held with the support of ONIT Russian Academy of Sciences

It is our great pleasure to invite you to participate in the Thirteenth National Supercomputing Forum (NSCF 2024)

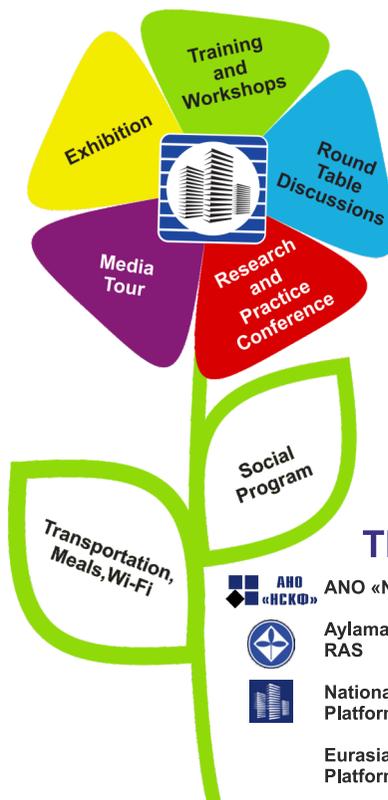

The Forum will be dedicated to key issues related to the development and application of high performance computing, grid, and cloud technologies.

Information and registration at  
<https://2024.nscf.ru/>

## The Forum Hosts:

-  ANO «National Supercomputing Forum»
-  Aylamazyan Program Systems Institute of RAS
-  National Supercomputing Technology Platform
- Eurasian Supercomputing Technological Platform (ESTP)

Information and registration at  
<https://2024.nscf.ru/>

The NSCF is dedicated to the creation and application of HPC technologies, supported by the Department of Nanotechnologies and Information Technologies of the RAS.

## Hosts, sponsors and partners of NSCF-2024

ANO «National Supercomputing Forum»

Aylamazyan Program Systems Institute of RAS

National Supercomputing Technology Platform

Eurasian Supercomputing Technological Platform (ESTP)

## NSCF 2023 in Figures

Participants: 148 Specialist of 65 organizations from 24 cities. Events: 9 thematic sections (7 plenary, 78 breakout), online press-conference. In addition, the “Mathematics in supercomputing era” session took part with 10 reports.

Information and registration at  
<https://2024.nscf.ru/>

## NSCF Interesting Facts

**2013.** Marc Shmulevich, Deputy Minister of Communications and Mass Media of the Russian Federation, attended NSCF 2013 and spoke of the measures taken by the Government to support and promote domestic supercomputing technologies.

**2014.** The National Supercomputer Forum's award was founded. Any decisions concerning the NSCF Award are taken by the entire community of the Forum.

**2016.** The exhibition went beyond the building to an open area — Mobile computing complex was demonstrated on the basis of the car KAMAZ.

**2018.** For the first time, a youth conference for undergraduate and graduate students was held on the NSCF basis.

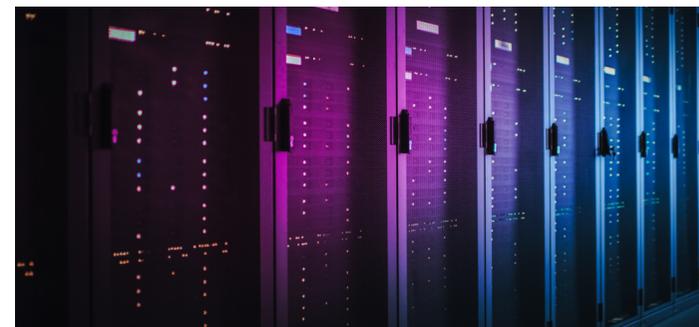

**2018.** During the NSCF-2018 AMD company made the first Russian announcement of the new Radeon Instinct™ MI60 and MI50 accelerators, built using 7 nanometer technology

**2022.** Conference-satellite “Cloud and distributed computing in the digital management” was held for the third time.

**2023.** Conference-satellite “Cloud and distributed computing” was held for the fourth time.

**Forum participants will be involved in decision making at the industry level. Join us!**
